

# Creativity

Creativity is using your imagination to come up with something new, or to solve a problem.

Creativity can be simple, and something you do every day, like these kids looking at clouds.

Creativity is useful for solving problems, and it helps make us unique. The last gardener below is certainly creative in his choice of location for his garden, and it solves the problem of not having enough sun inside his apartment!

*The garden will go by the shed.*

*The garden will go by the fence.*

*The garden will go on the roof!*
